Basic HTML Resume

Introduction:

The Basic HTML Resume project creates a clear and simple resume for given person using basic HTML. It includes important sections like a summary of his career, skills, work experience, education, certifications, and languages. The design is easy to read and accessible on any device or browser. There's also an option to download the resume as a PDF for convenience.

Objective:

- **Enhance HTML Skills:** To improve my understanding of HTML by creating a well-structured resume, focusing on proper use of tags, layout techniques, and semantic elements.
- **Practice Web Design Principles:** To apply basic web design principles in a practical project, learning how to create a clean, user-friendly layout that is both visually appealing and functional.

Features:

- Displays personal details and contact information.
- Provides a professional summary.
- Lists key skills.
- Shows work experience and achievements.
- Details educational background.
- Lists professional certifications.
- Shows languages spoken.
- Allows resume download.
